

DRYWALL BOARD TROLLEYS

NEW

BOARD TROLLEYS

- easy handling of drywall boards
- solid steel construction
- wooden boards & sheet materials
- trolleys are produced with pneumatic tyres
- heavy duty tubular frames
- large wheels allows use indoors or on site

The two wheel board trolleys are produced with rigid tubular frame and pneumatic tyres. The drywall trolleys are designed for easy handling of sheet and board materials

They are narrow enough to easily go through a doorway

The two wheeled board trolleys have pneumatic tyred wheels ideal for areas with uneven or soft flooring, capable of carrying a wide variety of panel products and have a carrying capacity of 100kg

The four wheel panel and sheet transporter has been designed for the safe transportation of panel and board products, doors, tables and radiators on the building site. The truck has two removable rails which can be located in any of five positions to suit the load. It is fitted with two swivel and two fixed rubber tyred wheels. The four wheel trolleys have a carrying capacity of 600kg
