

DUSTEX VACS

- large area filters
- add-on pre-separator for heavy dust volumes
- reduced hazards through airborne dust
- effective dust control for fine dust particles
- 'M' rated filters as standard
- 'H' rated Hepa filters available

The XD303 Autovac has 3 motors, each one fitted with their own independent filter

The machine works automatically with 2 suction motors and the other motor idling for cleaning process

Thanks to the motor operation cycles, all the filters get cleaned in turn allowing the vacuum cleaner to work continuously

Dustex vacs will control dust at source to give a cleaner and more professional working environment as required by main contractors and authorities

The dustex vacs have hi-flow by-pass vacuum motors and teflon primary filters. Heavy duty rotomolded vacuum drum and metal frame

When coupled with the PC95 pre-separator cyclone, 95% of the dust is removed before it gets to the main vac filter. Using the pre-separator and vac to prep plaster walls or drywall joints reduces down time for filter maintenance

APPLICATIONS

- for grinding concrete & stone
- sanding plaster dust & drywall joints
- wood & board sanders
- paint & coatings

DUSTEX VACS	XD303
Power	3000w
Weight	24kg
Size WxL	53x54cm
Height	145cm
Vacuum	235m ³ /hr
Noise level	476m ³ /hr
Voltage	110v or 230v

DUSTEX VACS	XD181
Power	1500w
Weight	16kg
Size WxL	40x49cm
Height	105cm
Vacuum	235m ³ /hr
Noise level	71m ³ /hr
Voltage	110v or 230v
