

PLAZIFLEX SPRUNG BACK TROWELS

- new more durable extruded construction
- flexi-backed wing design
- replaceable blades & range of sizes
- excellent finish & lightweight to use
- no need for splashing water on final coat
- cover large areas with less trowel pressure
- easier on the arm & joints
- flexible blade suitable for curved surfaces
- for multi finish & skimming
- produced in the UK

MADE IN ENGLAND

These new improved PLAZIFLEX skimming trowels are for finishing and trowelling up topcoat plasters and finishes. They are lightweight and easy to use leaving an excellent finish on the final skim coat.

The trowels have a new sprung back design that gives flexibility across the blade width but rigidity along the length.

The trowel body has a stainless steel blade with alloy shank and soft handle; it slots into the plastic blade holder bracket on the flexible plastic blade.

The darby trowel has improved rigidity along the length and new roll grip handle. A clip on adjustable angle handle and extension pole is available for ceiling work.
