

### PLAZIFLEX® FLEXIBACK® TROWELS

- new more durable construction
- replaceable blades & range of sizes
- excellent finish & lightweight to use
- no need for splashing water on final coat
- cover large areas with less trowel pressure
- easier on the arm & joints
- flexible blade suitable for curved surfaces
- for multi finish & skimming
- PLAZIFLEX blades are produced in the UK

These PLAZIFLEX skimming trowels are for finishing and trowelling up topcoat plasters and finishes

They are lightweight and easy to use leaving an excellent finish on the final skim coat

The trowels have a flexiback design that gives flexibility across the blade width but rigidity along the length

The trowel body has a stainless steel blade with alloy shank and soft handle; it slots into the plastic blade holder bracket on the flexible plastic blade
