

BOARD RASPS & RENDERING TOOLS

- large size hand rasps
- for keying back aircrete blocks
- used on external insulation & finishing systems (EIFS)
- aluminium tools for use on render
- serrated spatulas for flattening render

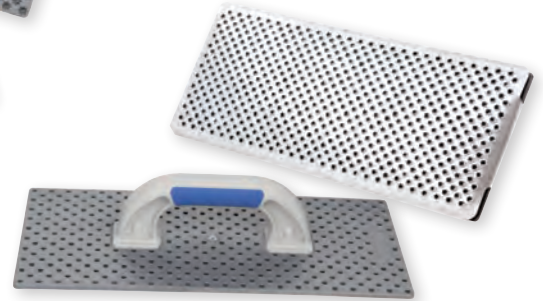

The metal and plastic rasps can be brushed clean and are durable in use

The ashlar cutters are used to create recessed joints and profiles in external render to replicate the appearance of traditional ashlar masonry and ground floor elevations. Square and V shaped blades available

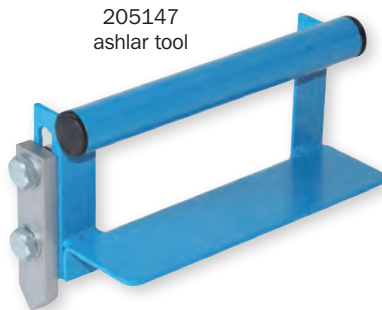

The serrated spatula is produced with a flexible stainless steel blade and is for knocking back textured topcoat renders to leave a flattened finish
