

RM65 & RM90 ROTAMIXERS

- robust forced action paddle mixers
- stainless steel adjustable paddles
- twin paddles for thorough mix action
- radial & axial mix, turns & lifts material
- easy clean for epoxies & cements
- produced in the UK

The RM65 & RM90 mixers are robust forced action mixers designed for those materials that can't be successfully mixed in a conventional free-fall cement mixer

The rotating drum produces a centrifugal mix and the technically designed paddles generate a radial and axial action. The machines are easy to clean and maintain, and replacement mixing tubs are economically priced. The machine includes a redesigned stainless steel L shaped side paddle and a rotary claw paddle which will mix right up to the tub sides and base

The RM65 is a compact forced action mixer for up to two bags of repair or fibre filled mortar, grout, epoxy, screed, flooring latex and coatings, cements, tile adhesives and special plasters. The RM90 can mix up to three bags. These mixers are produced with a 110v high torque motor and sealed gear box; 230v and 415v motors are also available for both models

- ✓ concrete repair mortars & epoxy mortars
- ✓ resin bound aggregates
- ✓ lime mortars
- ✓ latex floor screed & cementitious toppings
- ✓ floor coatings & self levellers
- ✓ heavy bodied paints & coatings
