

THREADED MIXER PADDLES

EPI MIXER THREADED PADDLES

- trade quality technically designed paddles
- generate a thorough mix action
- threaded shaft to fit directly into mixer drill
- largest range of designs & sizes
- guaranteed German made quality

Threaded EPI mixer paddles fit directly into the front end M14 thread of the mixer drill

The paddles are of proven design to give efficient mix action; they are produced to ensure a perfectly balanced shape that eliminates paddle wobble

MR3 paddles are the most popular design for a wide range of bagged materials, plaster, cements, resins, coatings, wet and pourable mixes. The mix action is thorough and consistent; the paddle floats in the mix making handling easy

The MR3 paddles develop a top to bottom mix action; the MR3R paddles are the same design but with a right hand spiral and bottom to top mix action

The new quick change connector is a two part fitting with the connector body attached to the power mixer output shaft and the adaptor tail piece attached to the M14 paddle thread
